PORTLAND 16, OREGON

Fall 1955

Spring 1956

TERMS AND INFORMATION

THE SHERWOOD NURSERY COMPANY located in Portland, Oregon, are leading propagators and growers of conifers and broad leaved evergreens.

SHIPPING SEASON: Plants can be shipped from our nursery from about October 1, throughout the fall, winter and spring to about April 1.

TERMS:

Our terms are **NET CASH**. Note carefully the following conditions:

1. We **PAY SHIPPING COSTS** on lining out stock to all points in the United States, Canada and Alaska. Lining out stock for this purpose is defined as any stock not listed as B&B, specimen, or BR.
2. At least **ONE-FOURTH** of the purchase price must accompany all lining out orders. Balance C.O.D. Payment in full in advance required on all B&B and BR shipments. No order accepted unless accompanied by at least 25% of the purchase price. You will save unnecessary correspondence and loss of time by observing this regulation. To save cost and inconvenience of C.O.D., payment in full should accompany orders of \$20.00 or less.
3. The prices quoted are **NET CASH PRICES**. Prices on our B&B and BR stock are F.O.B. our Portland Nursery, at Southeast 73rd Avenue and East Burnside Street.

POSITIVELY NO ORDER for lining out stock will be accepted for less than 25 plants of the same size and variety.

Prices quoted in the 10, 100, or 1000 lots apply to **ONE SIZE** and **ONE VARIETY** only.

We reserve the right to substitute grades when necessary and the difference is not too great.

Five plants of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate.

B&B signifies balled and burlapped; BR, bare roots; S, seedling not transplanted; T for each transplanting.

4. The prices quoted herein will hold only throughout the coming nursery year and supersede all other prices.
5. Orders will be dug and shipped promptly in the order in which they are received and as soon as digging conditions will permit. We aim to take care of all orders without unnecessary delay. No stock can be reserved later than April 1.

PACKING:

No packing charge is made on any stock.

We are shipping many small balled grades safely and profitably to the buyer packed BR (Bare Roots) thereby cutting down shipping costs. Where this can be done we have so indicated. Our method of packing insures the arrival of plants in perfect condition at any place in the United States, Canada and Alaska.

RESPONSIBILITY:

All the stock offered by this Company is grown out of doors and in their own fields with the greatest care and packed in like manner. **WE MAKE NO GUARANTEE**, either expressed or implied, that the plants will grow or give specific results. **ALL SHIPMENTS ARE MADE AT THE RISK OF THE PURCHASER AFTER BEING DELIVERED TO THE CARRIER IN GOOD CONDITION.** We accept all orders upon condition that they shall be void should frost, storm, crop failure or other cause result in injury or destruction of stock, or in inability to deliver.

SHERWOOD NURSERY COMPANY

141 S. E. 65th Ave., Portland 16, Oregon

TO REACH PROPAGATING NURSERY AND SALES OFFICE:

Drive east on East Burnside Street to Southeast 73rd Avenue.

Nursery is reached in a fifteen minute drive from the center of city.

General Nurseries are located on the Section Line Road.

Abies nobilis (Noble Fir)

The name noble describes this magnificent tree perfectly. A native of the Coast and Cascade mountains of western Washington and Oregon where its dignified appearance is set out in striking effect. The branches grow in whorls with great regularity along the main stem of the tree and are broadly spreading toward the tips. The foliage is usually a beautiful bluish green in color. It is valuable for landscaping purposes and the best of all for the production of Christmas trees. Very hardy.

6- 7 "....."	24.00	209

Abies sachalinensis (Sakhalin Fir)

A bright vivid green conifer native to the Sakhalin Island in the north Pacific, a place of much fog, cold and severe winters. Snowfall starts in August. Dense foliage. Upright.

1- 3 inches once transplanted.....	8	64
3- 6 "....."	10

Ajuga reptans rubra (Purpleleaf Bugle)

A worthy rock plant and ground cover. Has a rich green, slightly bronzed foliage, which is heavy and cleaves close to the ground. The blue flower spikes are 6 inches tall, are numerous and appear in the spring. There is the impression of pleasing and perfect harmony between blossoms and foliage. Evergreen.

1 year plants.....	8	64
--------------------	-------	---	----

Arbutus unedo (Strawberry Tree)

A spreading shrub with rich evergreen foliage. Has many charming, pearl white, bell shaped flowers followed in the fall by brilliant red strawberry like fruits. Does well in sun or partial shade and is drought resistant.

Aucuba japonica nana (Dwarf Aucuba) (Female)

This is a dwarf form with lustrous green leaves and a profusion of bright scarlet berries borne in clusters making a combination of surpassing beauty. Appeals to everyone. Hardy at Ogden, Utah. Comparatively new and rare, but certain to find a place in many gardens. Like the other Aucubas, it is dioecious and the male plants must be planted with the females to produce fruit. Shade loving evergreen.

3- 6 "....."	13	104
6- 9 "....."	16	128
9-12 "....."	20	160

Foliage heavy and luxuriant. Plant rather low growing and spreading. Flowers extremely large, carmine red, completely covering the plant. One of the finest of all azaleas. Maxwell Azalea, because of its superb habit of growth, splendid foliage and gorgeous display of blooms, undoubtedly ranks in a class by itself among lovely evergreens.

SHERWOOD AZALEAS

(Originated and introduced by Sherwood Nursery Co.)

A wonderful dwarf evergreen. Hardy and compact. Foliage dense, dark green. Flowers bright clear cerise, very lovely and borne in marvelous profusion completely covering the plant. Many consider this the best azalea we grow. Sherwood Cerise Azalea is brilliantly lovely. It has a great future. We have never been able to keep up with the demand.

1- 3 inches once transplanted.....	12	96
3- 6 " " ".....	14	112
6- 9 " " ".....	17	136

This is a hybrid hinodegiri and our own introduction. We have been growing it for several years in our nursery where it has attracted much attention. Foliage about the size and gloss of the Hinodegiri Crimson Azalea but the plant is hardier. Flowers are a clear lavender with speckled throat, completely cover the plant and are large for a dwarf size azalea. This evergreen fills a need which has not been met by any other azalea. Although showy it harmonizes with other colors in the garden. Mass plantings in gardens or on slopes and terraces are unexcelled.

1- 3 inches once transplanted.....			12	96
3- 6 " " "			14	112
6- 9 inches twice transplanted BR specimens.....	.60	5.40	49

24-30	" " " ".....	B&B	2.25	20.30	

The 12-15 inch grade can be safely shipped BR.

A magnificent azalea. Compact, dwarf and evergreen. Foliage so glossy it shines, bright green turning in cold weather to fiery red. Better foliage than *Azalea hinodegiri* from which it was hybridized. Flowers in such abundance that the foliage is almost entirely hidden and of the most brilliant

Yew like tree or shrub grown for its handsome evergreen foliage. Fastigiata is a remarkable form, of Chinese or Japanese origin. Columnar habit with upright branches and spirally arranged leaves. In the north it is hardy only in sheltered position. Very rare. Choice.

12-15	" " " " " " " " " " " "	28	224

A conifer of most satisfying effect, both in stately habit of growth, dense limbs and graceful foliage. Not hardy in areas of extreme cold, but fortunate, indeed, are localities which can grow this handsome tree. It is fine when grown in somewhat open or well spaced rows, and is equally good when grown as single specimens, needing no supporting plantings to enhance its beauty. Native of the Oregon coast.

18-24 inches twice transplanted.....	B&B	1.50	13.50	122

3- 4 feet twice transplanted.....	B&B	2.50	22.50	203

A semi dwarf and comparatively new addition to the cypress family which has added such a long list to the trees that we admire and love. Ellwood Cypress is a trim, compact, narrow pyramid with soft, feathery, bluish green foliage. It is superior to many of the older forms of cypress with which we are familiar and certainly will replace some of them. Naturally grows in its lovely form with scarcely any pruning. Hardy.

4- 5 " " " ".....	B&B	2.75	24.80	223

Beautiful golden form of the Green Column Cypress which it is like in all ways except color. An extremely golden evergreen the year round. The golden color is most pronounced during the winter months. Rare.

15-18	inches twice transplanted.....	B&B	1.25	11.30	102
18-24	" " " ".....	B&B	1.50	13.50	122
24-30	" " " ".....	B&B	1.75	15.80	142
30-36	" " " ".....	B&B	2.00	18.00	

A cone shape cypress erect in growth and with vertical foliage of turquoise blue. It is a valuable help in landscape plantings and for that reason is always a popular tree.

18-24 inches three times transplanted.....	B&B	1.50	13.50
24-30 " " " " ".....	B&B	1.75	15.80
30-36 " " " " ".....	B&B	2.00	18.00
3- 4 feet three times transplanted.....	B&B	2.50	22.50

A pyramid of living green which will add life and freshness to any planting. A striking conifer with dense vertical foliage.

3-	4 feet three times transplanted.....	B&B	2.50	22.50	203
4-	5 " " " "	B&B	2.75	24.80	223
5-	6 " " " "	B&B	3.00	27.00	243

Dwarf evergreen growing into a compact mass of velvety, dark golden, pendulous filaments. A remarkable irregular cone shaped conifer that adds a touch of cheer and brightness wherever used. Withstands full sun without burning. A rare type of the true dwarfs. Hardy.

CYTISUS (BROOMS)

Cytisus kewensis (Kew Broom)

Dwarf creeper, making trailing masses 4 to 5 feet across and 1 to 2 feet high. Bears a profusion of creamy white flowers. Hardy and rare.

	Each	10	100	1000
6-12 inches once transplanted.....	\$	\$	\$ 18	\$ 144
12-18 " " " "	21	168

Cytisus praecox (Warminster Broom)

Sometimes called Moonlight Broom. Branches are heavy and numerous long and pendulous. Hardy, graceful, evergreen shrub. Flowers rich cream in color, completely covering the branches. A most pleasing and attractive shrub. Begins flowering at an early age. Of garden origin. Height 5 to 6 feet.

3- 6 inches once transplanted.....	12	96
6-12 " " " "	15	120
12-18 " " " "	18	144

Cytisus purgens (Provence Broom)

Hardy dwarf, evergreen broom growing to 3 feet in height. Grows into a compact globe without pruning. Profuse bloomer. Flowers brilliant yellow, completely covering the plant. Fine rockery shrub. Rare.

3- 6 inches once transplanted.....	12	96
6-12 " " " "	15	120
12-18 " " " "	18	144

Cytisus scoparius (Borsch's Prostrate Broom)

Grows about 3 feet tall with a spread of 6 to 8 feet, making it very desirable for bank plantings. Foliage is dense. Flowers are of tri-color effect in blending of bright garnet red, rose and ivory. The color effect at a distance is rose flecked with garnet. A most profuse bloomer and unexcelled in its class. Hardy.

3- 6 inches once transplanted.....	12	96
6-12 " " " "	15	120

Cytisus scoparius (Burkwood)

Flowers are red with some bronze and pink mixed in. There is very little yellow and the general effect is dark red. Bushy erect growth, heavy bloomer. Hardy. Of English origin.

3- 6 inches once transplanted.....	12	96
6-12 " " " "	15	120

Cytisus scoparius (California)

Flowers are large, foliage extra good. There is a pleasing intermingling of crimson, cream and rose in the flowers, which are well displayed on somewhat open branches. The flowers are lighter than Dorothy Walpole. The general color effect is distinctly pink.

3- 6 inches once transplanted.....	12	96
6-12 " " " "	15	120

Cytisus scoparius (Geoffrey Skipworth)

Erect and spreading in habit, small flowers, very profuse blossomer, rose and cream. Effect is purplish pink.

3- 6 inches once transplanted.....	12	96
6-12 " " " "	15	120

Cytisus scoparius (Lady Moore)

Flowers crimson, cream and gold. Very similar to Stanford but plant is more dwarf and spreading. Rugged in appearance.

3- 6 inches once transplanted.....	12	96
6-12 " " " "	15	120

Euonymus radicans vegetus argenteo-marginatus (Variegated Bigleaf Wintercreeper)

Much the same as the Silveredge Wintercreeper but larger and more spreading and with larger leaves which take on charming tints of red and pink that are a delight in the winter season. Foliage dense. Height about 2½ feet, spread 4 feet or more. Shade loving evergreen.

	Each	10	100	1000
1- 3 inches once transplanted.....	\$	\$	\$ 10	\$ 80

Gaultheria shallon (Salal)

Low, hardy evergreen shrub to 2 feet. Native British Columbia to California. Has pinkish white flowers and blue berries, used by the Indians and sometimes for jelly making. Is full branching and the leaves are large, rounded and decorative. Sun or shade.

12-15 inches twice transplanted.....	B&B	1.00	9.00	81
15-18 " " " ".....	B&B	1.25	11.30	102
18-24 " " " ".....	B&B	1.50	13.50	

Fir—See *Abies*, *Cunninghamia*, *Pseudotsuga*

Gaultheria procumbens (Wintergreen)

This is the little plant which produces the true wintergreen flavor and from which wintergreen oil is extracted. There is nothing with which it can be compared for the reason that it is in a class by itself. It is a sturdy, hardy little subject flourishing northward into Canada and well to the southward particularly in elevated regions. The tiny leaves are nicely rounded, deep green and glossy and take on rich shadings of deep red in the autumn. Grows to a height of only 4 to 6 inches but produces a matted ground covering. Bears bright red berries in great abundance. These berries, which are edible, remain on the plants until the following summer. Children often take delight in gathering them as well as the tender young leaves for their sweet wintergreen flavor. When food is scarce in the winter season they form a part of the food of game birds. The fine foliage, the small, delicate, pink, bell-shaped flowers, the brilliant red berries and its hardiness combine to make it one without peer in its class. To know this delightful little plant is to admire and love it and it should occupy a place in every garden where it will grow. Along with its other merits it is easy to handle.

2 year once transplanted.....	10	80

Libocedrus decurrens (Western Incense Cedar)

A shapely pyramid in form, with fine, fan-like foliage, that is dense, and a beautiful glossy-green. The foliage is also delightfully fragrant. The bark is bright cinnamon-red. Incense Cedar is native Oregon to California and western Nevada. Flourishes on the cold eastern slopes of the Cascade mountains and in dry, rocky soil. A tall growing tree. As an ornamental, they are grown chiefly for their handsome, fragrant evergreen foliage and charming habit of growth. The perfect symmetry of growth from the ground to tip of the tree is a characteristic that places *decurrens* almost in a class by itself, the only other conifer that is comparable being *Sequoia gigantea*.

Mahonia aquifolium (Oregon Grape)

An ornate little evergreen shrub, native of Oregon, where it is much loved and enjoyed. Leaves are holly like and bright green. Has long clusters of bright golden yellow flowers in the spring, followed by bunches of bright blue, grape-like berries, which are sometimes used for jelly making. Attractive in foliage, flower and fruit. Also fine for interior decorative purposes. Some leaves take on autumn tints of crimson, deep red, bronze and gold. The shrub is at its best in group plantings. One of the hardiest of the broad-leaved evergreens. Height variable from 3 feet.

Phillyrea decora (Lanceleaf Phillyrea)

Native of western Asia. Decora, meaning elegant, surely describes this ever-green. Round topped shrub growing to 6 feet or more. Large, glossy, dark green leaves. Small white flowers. Hardy. Rare.

1- 3 inches once transplanted.....	10	80
3- 6 " " ""	12	96

Photinia serrulata (Chinese Photinia)

Native of China. A hardy, rapid growing evergreen with large, dark green, glossy leaves having serrated edges. Without doubt one of the most desirable of all broad-leaved shrubs. The tips of the new foliage in spring and summer are fiery red, simulating blossoms in appearance when seen at a distance. Its shades of red and crimson are unsurpassed by any evergreen. Medium sized plant which responds well to pruning.

Phyllodoce empetriformis (Pink Mountain Heather)

Color vivid green, branches stocky and well clothed with needle-like foliage. Height 12 inches. Flowers dense, bright pink. Common in the high Cascades where it is called Alpine Heather but seldom found in the nursery trade. Thrives at lower levels. Slow grower, and defies snow and cold weather. Enjoys shade and moisture. *Empetriformis* means, "beautiful plant growing in the rocks."

PICEA (SPRUCES)

Picea engelmanni (Engelmann Spruce)

A large growing tree, having slender, spreading branches which form a dense, narrow pyramid. Has bluish green to steel-blue foliage. Hardy ornamental. Native of the Cascade and Rocky mountains.

Picea glauca conica (Dwarf Alberta Spruce)

A neat, trim, dwarf conifer growing into a close, compact, narrow pyramid. Foliage light green and of pleasing softness in appearance. A very rugged, hardy, slow-growing tree, admirably adapted to small homes where space is a factor. A great favorite and deservedly so.
